

Save Energy by Finding and Fixing Leaks

Compressed air can be one of the most expensive sources of energy in a facility or plant. Unfortunately, it can also be the most wasteful. In fact, the overall efficiency of the typical compressed air system can be as low as 10%–15%.¹ With a Compressed Air Leak Audit, an expert can identify where your system is running inefficiently, so you can save energy and money. Plus, your business can **save 50% on the cost of the audit** with incentives from FirstEnergy's Pennsylvania electric companies.²

How does this offering work?

Simply contact a Program Ally to receive a Compressed Air Leak Audit. They will complete and submit the necessary paperwork, including a compressed air leak study. You can find a Program Ally by visiting www.energysavePA-bizsolutions.com/find-a-trade-ally.

What are the benefits?

A Compressed Air Leak Audit is a simple way to identify your system's inefficiencies, so you know exactly where to start. Taking this first step is one of the best ways you can lower your business' energy expenses.

- FirstEnergy's Pennsylvania electric companies can provide incentives for the audit as well as help cover the costs of fixing the leaks that you find.
- Identifying and fixing leaks directly benefit your business' bottom line. In fact, leaks can waste as much as 20%-30% of the compressor's output.¹
- Fixing leaks saves energy and money, improves performance, and reduces unnecessary wear and tear.

How can my business apply?

Visit www.energysavePA-bizsolutions.com/audit-incentive and work with a Program Ally to complete a Facility Audit Incentive Business application. To view all incentives available through FirstEnergy's Pennsylvania electric companies' Commercial & Industrial Energy Efficiency Program, visit energysavePA-business.com.

² Total incentive may not exceed \$10,000. See energysavePA-bizsolutions.com/audit-incentive for complete terms and restrictions.

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit energysavePA.com.

By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs.

PA customers who have existing contracts with third party demand response service providers that were executed before June 1, 2021 (i.e., the start of Phase IV of Act 129 EE&C), have the option of retaining the PJM capacity rights associated with EE&C projects when participating in FirstEnergy PA Act 129 energy efficiency and peak demand reduction programs.
