

## LIMITED-TIME OFFERING

# Start with twice the incentives, then receive even more

For a limited time, you can receive twice the incentive dollars (or more) when your lighting application is submitted and approved through August 31, 2024. That means, you can receive \$0.10 per kWh displaced on base lighting projects—that’s double the standard incentive of \$0.05. Want to save even more? Add qualifying lighting technologies to boost your incentive (see right for more details).

## The more you add, the more you receive

For a limited time, add the following technologies to your lighting project to qualify for even higher incentives!

Add to Your Lighting Project	Increased Limited-Time Incentive
Zone Controls	\$0.15/kWh displaced
Fixture Controls	\$0.18/kWh displaced
Network Controls	\$0.20/kWh displaced
Network Optimization	\$0.10/kWh displaced + \$300/kW

## Take advantage of this limited-time offer.

Terms apply. See program website for details. Must apply for and receive preapproval between March 1, 2024, and August 31, 2024. The preapproved project will be eligible for increased incentives for a period of 12 months from the preapproval date. All EM&V must be completed by December 31, 2025. Should the project not be completed within 12 months from the preapproval date, written approval will be required by FirstEnergy’s Pennsylvania electric companies to maintain project status; otherwise, the project application will be processed at the original incentive rate.

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit [energysavePA.com](http://energysavePA.com). By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights, which refers to the demand reduction associated with any energy efficiency and peak-demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs. FirstEnergy’s Pennsylvania utilities, their parents, subsidiaries, employees, affiliates, and agents assume no responsibility for the performance of the equipment or equipment warranty, the quality of the work, labor and/or materials supplied, and/or the acts or omissions of any contractor. PA customers who have existing contracts with third party demand response service providers that were executed before June 1, 2021 (i.e., the start of Phase IV of Act 129 EE&C), have the option of retaining the PJM capacity rights associated with EE&C projects when participating in FirstEnergy PA Act 129 energy efficiency and peak demand reduction programs.
