

FirstEnergy’s Pennsylvania electric companies offer a wide range of programs to help your business save energy, lower costs and improve your operation.

Qualifying equipment is subject to specifications, terms and conditions as outlined by FirstEnergy’s Pennsylvania electric companies. All rebate values noted below are subject to change and are current through Dec. 31, 2024. Visit [www.energysavePA-bizsolutions.com](http://www.energysavePA-bizsolutions.com) for individual program requirements and specifications, along with the most up-to-date eligible rebate measures and values.

	PROGRAM	INCENTIVES	LIMIT REQUIREMENTS
<b>Lighting</b>	This program provides incentives to encourage participants to install high-efficiency lighting equipment and controls for retrofit/renovation of existing facilities and new construction projects.	<ul style="list-style-type: none"> <li>Per-unit incentives are available for technologies such as linear fluorescents, fixtures, LEDs and LED exit signs.</li> <li>Lighting equipment that does not meet the requirements of the prescriptive program may be incentivized on a \$.05/kWh performance basis.</li> </ul>	<ul style="list-style-type: none"> <li>Incentives are capped at total equipment cost (excluding taxes).</li> <li>Equipment must be DesignLights Consortium (DLC) or ENERGY STAR® certified.</li> <li>See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>Custom Equipment</b>	This program offers incentives for technologies or customer-specific energy efficiency projects that do not meet the eligibility criteria for other business programs.	<ul style="list-style-type: none"> <li>Custom equipment projects are eligible for incentives on a \$.05/kWh performance basis.</li> <li>Per-unit incentives are available for variable-speed drives and three-phase motors.</li> <li>Demand rebate up to \$150 KW will be calculated based upon customers load profile during coincident peak times (2–6 p.m., Monday–Friday, 6/1–8/30) and the associated average demand reduction during that time frame.</li> </ul>	<ul style="list-style-type: none"> <li>Incentives are limited to 50% of the total project cost, including labor, capped at \$500,000.</li> <li>See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>Appliances and Electronics</b>	This program offers incentives to participants to install high-efficiency equipment such as ENERGY STAR certified appliances and electronics.	<p>Per-unit incentives are available for ENERGY STAR equipment such as:</p> <ul style="list-style-type: none"> <li>Commercial clothes washers/dryers</li> <li>Refrigerators and freezers</li> <li>Heat pump/solar water heaters</li> <li>Window AC units</li> <li>Pre-rinse spray nozzles</li> <li>UPSs and office equipment</li> </ul>	<ul style="list-style-type: none"> <li>Incentives are capped at total equipment cost (excluding taxes).</li> <li>Equipment must be ENERGY STAR certified.</li> <li>See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>HVAC</b>	This program offers incentives to install and encourage participants to install high-efficiency heating, ventilation and air conditioning equipment.	<p>Flat-rate per unit or per-ton capacity incentives are available for:</p> <ul style="list-style-type: none"> <li>Air conditioners</li> <li>Water-cooled electric chillers</li> <li>Heat pumps</li> <li>PTAC/PTHP</li> </ul>	<ul style="list-style-type: none"> <li>HVAC equipment must be for ambient cooling applications only and must meet or exceed the minimum efficiency rating required for the equipment type and cooling capacity.</li> <li>Only new equipment is eligible for incentives.</li> <li>See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>Instant Discount</b>	This Program offers instant discounts at the time of purchase to customers and contractors that buy qualified energy-efficient equipment at a participating distributor.	<p>Instantly applied incentives are available for the following energy-efficient product types:</p> <ul style="list-style-type: none"> <li>Lighting</li> <li>Food service products</li> <li>HVAC products</li> </ul>	<ul style="list-style-type: none"> <li>Product installed must be purchased at a participating distributor.</li> <li>Incentives vary and are available for qualified lighting, food service, and HVAC equipment.</li> </ul>

	PROGRAM	INCENTIVES	LIMIT REQUIREMENTS
<b>Food Service Equipment</b>	This program offers incentives to install high-efficiency food service equipment and commercial refrigeration.	<p>Incentives are available for ENERGY STAR equipment such as:</p> <ul style="list-style-type: none"> <li>• Ice machines</li> <li>• Commercial reach-in refrigerators/freezers</li> <li>• Refrigerated display cases/walk-ins</li> <li>• Electric combination/convection ovens, steam cookers, and other select food service equipment</li> <li>• Anti-sweat heater controls and vending machine controls</li> </ul>	<ul style="list-style-type: none"> <li>• Incentives are capped at total equipment cost (excluding taxes).</li> <li>• Only new equipment is eligible for incentives.</li> <li>• See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>Facility Audits</b>	This program is intended to encourage customers to acquire a detailed ASHRAE Level 2 third party energy audit for their buildings or systems.	<ul style="list-style-type: none"> <li>• The cost of a facility audit is reimbursed at \$0.05/kWh of the qualifying implemented measures identified in the audit up to 50% of the audit cost but not more than \$10,000.</li> </ul>	<ul style="list-style-type: none"> <li>• Audit incentive requests require pre-approval prior to the participant signing a contract with the audit service provider.</li> <li>• Studies must be provided by individuals or firms that are capable of performing energy audits that meet the program guidelines.</li> <li>• Energy conservation measures (ECMs) from at least three major end use areas must be evaluated.</li> <li>• ECMs must be implemented within 18 months of completing the audit or before May 31, 2026.</li> <li>• See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>Solar</b>	This program offers incentives to install qualifying Solar Photovoltaic (PV) projects and to participate in receiving rebates on energy usage.	<ul style="list-style-type: none"> <li>• Incentives \$0.05/kWh capped at 50% of project costs or \$500,000.</li> </ul>	<ul style="list-style-type: none"> <li>• See the program website for more details regarding specific requirements for each technology.</li> </ul>
<b>Combined Heat and Power</b>	This program provides incentives for Combined Heat and Power (CHP) systems which transform waste into usable electricity.	<ul style="list-style-type: none"> <li>• Incentives \$0.03/kWh capped at 50% of project costs or \$500,000.</li> </ul>	<ul style="list-style-type: none"> <li>• See the program website for more details regarding specific requirements for each technology.</li> </ul>

### All programs are subject to change without notice.

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit [energysavePA.com](http://energysavePA.com). By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs. PA customers who have existing contracts with third party demand response service providers that were executed before June 1, 2021 (i.e., the start of Phase IV of Act 129 EE&C), have the option of retaining the PJM capacity rights associated with EE&C projects when participating in FirstEnergy PA Act 129 energy efficiency and peak demand reduction programs.
