

Power Your Business's Growth with Energy-Efficient Rebates

Make your farm or agriculture business a more sustainable and eco-friendly operation without the high price tag! FirstEnergy's Pennsylvania energy companies offer rebates on a range of energy-saving projects that not only allow you to cut down on your energy costs, but also provide greater efficiency on day-to-day operations.

These energy-saving projects are perfect for livestock and dairy farms, greenhouses, crop farms, indoor agriculture, on-farm processing facilities, and more.

To view all the rebates available from FirstEnergy's Pennsylvania electric companies Energy Solutions for Business Program, visit www.energysavePA-bizsolutions.com.

- VFDs for Vacuum Milk Pumps
- Dairy Refrigeration Tune-Ups
- Engine Block Heater Timer

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit energysavePA.com. By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs. PA customers who have existing contracts with third party demand response service providers that were executed before June 1, 2021 (i.e., the start of Phase IV of Act 129 EE&C), have the option of retaining the PJM capacity rights associated with EE&C projects when participating in FirstEnergy PA Act 129 energy efficiency and peak demand reduction programs.
