

## Explore Rebates on Energy-Efficient Appliances and Electronics

FirstEnergy's Pennsylvania electric companies are here to help your business save on energy costs with rebates on energy-efficient appliances and electronics. When you make the switch to energy-efficient equipment, you're not only saving money on energy costs, but participating in more sustainable, eco-friendly practices. Plus, the savings start immediately with rebates exclusively for energy-efficient electronics.

To view all the rebates available from FirstEnergy's Pennsylvania electric companies Energy Solutions for Business Program, visit [www.energysavePA-bizsolutions.com](http://www.energysavePA-bizsolutions.com).

- Heat Pump Water Heaters
- Dehumidifiers
- Water Coolers
- Uninterruptible Power Supplies
- Select Office Equipment
- Level 2 Electric Vehicle Charging Cord
- Small Network Level Control Software
- Advanced Power Strips

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit [energysavePA.com](http://energysavePA.com). By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs. PA customers who have existing contracts with third party demand response service providers that were executed before June 1, 2021 (i.e., the start of Phase IV of Act 129 EE&C), have the option of retaining the PJM capacity rights associated with EE&C projects when participating in FirstEnergy PA Act 129 energy efficiency and peak demand reduction programs.
